There is a defective valve in flushing tank in closet No. 8, which prevents refilling of tank. The walls in toilet rooms, boys and girls sides, are slightly damp. Attention is invited to the following statement: Schoolrooms. It will be observed that there is a deficient amount of air space in all rooms except the southeast room, first floor (which is used as a kindergarten), when said air space is computed according to the number of desks in each room. The following table shows the air space for each pupil according to enrollment. As the enrollment changes from month to month, this factor is subject to constant change. It will be noted that there is a deficiency in air space in six of the nine rooms. The relative humidity, as usual, is too low. The temperature record presents a most satisfactory condition, being...
