The building is of rectangular design to accommodate four 2000-kilowatt transformer equipments. Panama will demand a relatively constant supply ranging over many hours, similar to installations furnishing water to a diversified community. In addition to the above load there is a demand for general purposes, including the lighting system of Balboa and Ancon, and furnishing, temporarily, power for the Panama tramways system. Gamboa Substation. The permanent water supply for the southern end of the Canal towns is obtained from Chagres River Valley, east of the Canal, where the Gamboa pumping plant is installed.
