

An Introduction to Scientific Research Methods in Geography and Environmental Studies (Paperback)

Filesize: 8.71 MB

Reviews

This written ebook is fantastic. It is probably the most incredible ebook we have read. Its been written in an extremely basic way in fact it is just following i finished reading this publication where basically modified me, affect the way i think.

(Howell Reichel)

AN INTRODUCTION TO SCIENTIFIC RESEARCH METHODS IN GEOGRAPHY AND ENVIRONMENTAL STUDIES (PAPERBACK)

Sage Publications Ltd, United Kingdom, 2012. Paperback. Book Condition: New. 2nd Revised edition. 242 x 172 mm. Language: English . Brand New Book. Covers a broad range of subjects that undergraduates in the discipline should be familiar and comfortable with upon graduation. From chapters on the scientific method and fundamental research concepts, to experimental design, sampling and statistical analysis, the text offers an excellent introduction to the key concepts of geographical research. The content is applicable for students at the beginning of their studies right through to planning and conducting dissertations. The book has also been of particular support in designing my level 1 and 2 tutorials which cover similar ground to several of the chapters. - Joseph Mallalieu, School of Geography, Leeds University Montello and Sutton is one of the best texts I ve used in seminars on research methodology. The text offers a clear balance of quantitative vs. qualitative and physical vs. human which I ve found particularly valuable. The chapters on research ethics, scientific communication, information technologies and data visualization are excellent. - Kenneth E. Foote, Department of Geography, University of Colorado at Boulder This is a broad and integrative introduction to the conduct and interpretation of scientific research, covering both geography and environmental studies. Written for undergraduate and postgraduate students, it: * Explains both the conceptual and the technical aspects of research, as well as all phases of the research process * Combines approaches in physical geography and environmental science, human geography and human-environment relations, and geographic and environmental information techniques (such as GIS, cartography, and remote sensing) * Combines natural and social scientific approaches common to subjects in geography and environmental studies * Includes case studies of actual research projects to demonstrate the breadth of approaches taken It will be core reading for students studying...
