

## Radiation Hazard in Space

Filesize: 4.11 MB

### ***Reviews***

*It is just one of the most popular ebook. It is written in simple words and not confusing. I am just happy to tell you that this is actually the finest ebook I have got read inside my very own existence and may be the greatest ebook for at any time.*

## RADIATION HAZARD IN SPACE

Book Condition: New. Publisher/Verlag: Springer Netherlands | The mono graph contains 8 chapters, and their contents cover all principal aspects of the problem: 1. Introduction and brief his tory ofthe radiation problem and background information ofradiation hazard in the near-Earth and interplanetary space. 2. General description of radiation conditions and main sources of charged particles in the Earth&apos;s environment and interplanetary space, effects of space environment on spacecraft. 3. Basic information about physical conditions in space and main sources of charged particles in the Earth&apos;s environment and interplanetary space, in the context of "Space W eather" monitoring and prediction. 4. Trapped radiation belts of the Earth (ERB): theory of their origin, spatial and temporal dynamics, and experimental and statistical models. 5. Galactic cosmic rays (GCR): variations of energetic, temporal and spatial characteristics, long-term modulation, and anomalous cosmic ray (ACR) component, modeling oftheir dynamics. 6. Production of energetic particles (SEPs) at/ne ar the Sun: available databases, acceleration, propagation, and prediction of individual SEP event, statistical models of solar cosmic rays (SCR). 7. Existing empirical techniques of estimating, prediction and modeling of radiation hazard, methodical approaches and constraints, some questions of changes in the Earth&apos;s radiation environment due to changes of the solar activity level. 8. Unresolved problems of radiation hazard prediction and spacecraft protection, radiation experiments on board the spacecraft, estimating of radiation conditions during interplanetary missions. Space does not allow us to explain every time the solar-terrestrial and radiation physics nomenclature used in current English-language literature. | Preface. 1: Introduction and Brief History. 1.1. Space Radiation Environment. 1.2. Identification of Radiation Hazard. 1.3. Multilevel Nature of the Problem. 1.4. Recent Developments. 1.5. General Picture of Radiation Disturbance. 2: Radiation Conditions in Space. 2.1. Character of Radiation Influence. 2.2. Main Concepts, Definitions and Terms. 2.3. Objects of Radiation Impact. 2.4. Dynamics...
