Smith, Green polymer chemistry is a very active area of research that has attracted the attention of the scientific community and the public at large. Developments in this area are stimulated by health and environmental concerns, interest in sustainability, desire to decrease the dependence on petroleum, and opportunity to design and produce "green" products and processes. A large number of publications have appeared, and many new methodologies have been reported. In consideration of the rapid advances in this area, the editors organized an international symposium on "Green Polymer Chemistry: Biocatalysis and Biobased Materials" at the American Chemical Society (ACS) national meeting in Philadelphia, PA in August 2012. The symposium was very successful, with a total of 63 papers and active participation and discussions among the leading researchers. Whereas all aspects of Green Polymer Chemistry were covered, a particular emphasis was placed on biocatalysis and biobased materials. Biocatalysis involves the use of enzymes, microbes, and higher organisms to carry out chemical reactions. It provides exciting opportunities to manipulate polymer structures, to discover new reaction pathways,...
